5GLOGINNOV

5G LOGINNOV consultation workshop
On policy recommendations for 5G core technologies in logistics

29 March 2023
14:00 – 16:30 CEST
Hybrid workshop

Register here

The EU-funded project 5G-LOGINNOV aims to optimise freight and traffic operations at ports and logistics hubs by using new innovative concepts, applications and devices supported by 5G technologies, Internet of Things (IoT), data analytics, next generation traffic management, Cooperative, Connected and Automated Mobility (CCAM) and the 5G logistics corridor.

The purpose of this workshop is to collect additional inputs on the policies that have been developed through the project and that could support the advancement in the adoption of 5G technologies in the logistics sector.

Agenda

14:00 Welcome and presentation of the agenda

14:10 Presentation of 5G-LOGINNOV project and results

14:30 Presentation of 5G-LOGINNOV policy recommendations

14:45 5GPPP roadmap

15:00 Coffee break

15:15 Discussion on the policies and identification of common policies

16:15 Conclusions

16:30 End

Deadline to register is the 15th of March.

More details about the venue and the link to join online will follow soon
